

Rise

The caterpillar low on the left, the moth high on the right, and the diffuser plume rising between them — the bubbles Ryan was designing doing the work of the change. His tattoos and his engineering in one mark, read left to right and bottom to top.

ACTUAL SIZE ON THE HAT — PRINTED 1:1

The dashed line is all the room there is to stitch into. Hold this page against a cap to judge it. Shown in dark thread for clarity — on a navy cap it stitches as above.

WHAT DO YOU THINK?

Your name

☐ Love it ☐ It's fine ☐ Not this one

Anything you'd change

Still to decide: cap colour, and whether the hat carries a date.

Luna

The moth from Ryan's tattoo — *Actias luna*, drawn to the real proportions of the species: the near-straight forewing edge, the eyespots, the feathery antennae, and the long trailing tails. Stitched in moth green.

On a khaki or stone cap

One thread only — cheapest to stitch

Metamorphosis

Both tattoos together, in reading order — the caterpillar on the left, the moth on the right. The same animal twice. The change in size carries the idea, so there is no arrow between them.

ACTUAL SIZE ON THE HAT — PRINTED 1:1

4 1/2 in — the full width of a cap front

Spine

A vertebral column beside the name, seen from the side and perfectly straight — which is *Straight Up Spine & Posture* taken literally. The concept tied to the practice rather than to the tattoos.

Varsity

TEAM set small above a full-width RYAN LEE, closed by a rule and a diamond. The plainest of the seven and the one that reads fastest from across a room.

Roundel

A patch-style badge: an RL monogram in a double ring with the full name beneath. Holds together at the smallest size, so it also works on a shirt or a jacket.

Bubbles

A rising plume drawn from the fine-bubble diffuser Ryan was designing — bubbles leaving one source and spreading as they climb. The concept that points at his engineering work.
